

NITISH

Full Stack Developer

📞 8285510113 @ nitishneeraj16@gmail.com 🔗 <https://www.linkedin.com/in/nitish-686698217> 📍 Faridabad, Haryana

CAREER OBJECTIVE

Full Stack Developer with 3.5 years of experience building scalable applications using React.js, Next.js, and Node.js. Strong problem solver focused on performance, clean code, and user-friendly design. Willing to learn, adapt, and deliver efficient end-to-end solutions.

EDUCATION

Bachelor of Technology (Computer Science Engineering)

Maharshi Dayanand University

📅 07/2016 - 12/2020

PROJECTS

Secure File Sharing Module with Role-Based Workflow & OTP Verification

- Developed an end-to-end secure file sharing system using Next.js (React.js), NestJS (Node.js), MongoDB, and Docker.
- Implemented role-based workflow (Admin, Uploader, Approver, Customer) for document lifecycle: upload → approval → delivery.
- Reduced manual paperwork by digitizing document handling and automating approval processes.
- Built SEO-friendly, high-performance UI with improved UX following Figma designs.
- Integrated OTP-based email verification for secure customer access.
- Added audit logs, secure APIs, and automated deployment using Docker for scalability.

User Module & HRMS with Role-Based Document Access

- Developed an end-to-end HRMS and user management system using Next.js (React.js), NestJS (Node.js), MongoDB, and Docker.
- Implemented fine-grained access control where users can view/download only authorized documents, while Admin can grant, monitor, or revoke access in real time.
- Designed multi-level roles (L1, L2, L3, L3+Download, Power User, Super User) with a flexible permission matrix.
- Reduced manual document handling by digitizing workflows and enabling secure, location-independent access.
- Built a fast, SEO-friendly UI with improved UX and real-time validation.
- Added audit logs, admin dashboard, and secure APIs for tracking activity, managing users, and blocking unauthorized access.

Centralized Access Portal (SSO)

- Designed and implemented a centralized Single Sign-On (SSO) system for multiple applications.
- Enabled seamless user access across platforms with a single authentication flow.
- Integrated applications across diverse environments (Windows, Linux, cloud hosting).
- Reduced repeated logins, improving user experience and authentication efficiency.
- Implemented secure authentication with optimized session management.
- Ensured scalable and reliable access across distributed systems.

SKILLS

Next.js

React.js

Express.js

Redux

Node.js

TypeScript

JavaScript

MySQL

MongoDB

PostgreSQL

jQuery/Ajax

CI/CD

AWS S3

Postman

RESTful APIs

Git

Github

Laravel

Bootstrap

Linux

WORK EXPERIENCE

Software Developer

Kleeto - Next Gen Paper Solutions Pvt. Ltd

📅 03/2023 - Present 📍 Gurugram, Haryana

- Built and enhanced document management solutions for digitizing records and streamlining document workflows
- Implemented efficient keyword-based indexing to enable fast and accurate document retrieval

Software Engineer

One97 Communications Limited (Paytm)

📅 12/2021 - 04/2023 📍 UP, Noida

- Developed and maintained backend APIs for financial services platform using Node.js
- Improved transaction reliability by optimizing API response handling

Graduate Engineer Trainee

Beryl Systems Private Limited

📅 10/2021 📍 Faridabad, Haryana

- Beryl Systems is a full-service based web and mobile application development company.

KEY ACHIEVEMENTS

Improved user experience by enabling seamless multi-application access.

Reduced authentication time by eliminating repeated logins.

Enhanced system security with centralized access control.

Enabled smooth integration across distributed systems.
